TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flask, FastAPI, RabbitMQ, Tailwind CSS, YOLOv8, OpenCV

Databases: PostgreSQL, MongoDB, Redis, Firebase

Tools: Docker, Git, GitHub Actions, Postman

EXPERIENCE

MERN Stack Developer Intern

May 2026 – July 2026

Frisky Trails

Remote, India

- Developed a full-stack Customer Relationship Management (CRM) platform from scratch using React, Node.js, and Express to streamline lead tracking and improve daily workflow.
- Engineered a secure backend with MongoDB and JWT authentication, and integrated third-party services like Cloudinary for file management and Nodemailer for automated emails.
- Collaborated using Git/GitHub workflows with feature branches, code reviews, and multiple pull request merges.

Web Developer Intern

Feb 2025 – Sept 2025

First Contact

Remote, India

- Designed Firebase Firestore queries to support real-time data retrieval for chat features.
- Built real-time chat features using WebSockets (Socket.io) and Wix Velo backend services.
- Implemented GitHub Actions to automate CI/CD workflows and improve deployment efficiency.

Research Intern

June 2025 – July 2025

Thapar Institute of Engineering and Technology

Patiala, India

- Collaborated in building a YOLOv8-based vehicle detection and tracking pipeline for real-time traffic monitoring.
- Implemented lane-wise vehicle counting and speed estimation using centroid tracking across video frames.
- Developed a real-time traffic analytics overlay displaying congestion level, flow efficiency, waiting time, and total vehicle count.

PROJECTS

Finance Tracker | *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Gemini AI* | Live | Github

- Built an AI-driven finance tracking system by integrating the Gemini API to automatically categorize transactions and provide personalized spending insights through a conversational assistant.
- Developed a full-stack dashboard using Next.js 15 and Tailwind CSS with JWT-based authentication.
- Engineered the backend using PostgreSQL and Drizzle ORM, implementing Server Actions to manage financial CRUD operations and generate real-time spending analytics with Recharts.

EventsNearMe | *Next.js, Leaflet.js, Node.js, Docker, MongoDB, Redis, RabbitMQ* | Live | Github

- Developed a full-stack, location-based event discovery platform utilizing Next.js, Node.js, and MongoDB, integrating React-Leaflet and SWR to deliver real-time, interactive mapping of nearby events without full-page reloads.
- Engineered a scalable, fully containerized microservices architecture with Docker, implementing Redis for optimized caching and a RabbitMQ/Bull worker queue to asynchronously process background tasks and reduce database load.

EDUCATION

Thapar Institute of Engineering and Technology, Patiala, Punjab

2024-2028

B.Tech Computer Science and Engineering

CGPA: 9.05

ACHIEVEMENTS

Innovation Award – Hackathon Winner

2025

- Recognized by Ulster University and ASME USA for an AI-driven sustainability project.

Problem Solving

- Solved 200+ DSA problems on LeetCode across arrays, DP, heaps, and graphs.
